

### *Introduction*

**T**he household expenditure and income (household budget) was first studied in the year 1314 by the National Bank of Iran. The main objective of the study was to obtain the consumption coefficients for calculation of living expenditure index.

After a long cease, in the year 1338, Economic Studies Office of the National Bank of Iran undertook a survey on the field by interviewing sample households in 23 cities of the country to revise the weight of the living expenditure index. The Central Bank of Iran has constantly conducted studies on urban households expenditure and income since the year 1344. In addition, survey of households expenditure in urban areas, on a larger scale, was taken by the SCI in the year 1347. Since the year 1353, the survey has covered both expenditure and income of urban households and continued to date, excluding the years 1355, 1357 and 1360. The results have been processed and published annually.

Survey of rural households expenditure and income was first conducted by the General Department of Public Statistics in the year 1342, and by the establishment of the SCI in the year 1344, the survey continued in a larger scale by the new organization.

Currently, statistics on urban households expenditure and income are released by both the Central Bank and the SCI, and those on rural households are released by the SCI.

In this chapter, the statistics on annual food and non-food average expenditures of urban and rural households have been presented by deciles of expenditure and household size, and data on the average urban and rural households annual income by income sources, has been presented through the results of the SCI's (sample) surveys taken according to the United Nations recommendations (NHSCP <sup>(1)</sup> and SNA <sup>(2)</sup>).

### *Definitions and concepts*

**Expenditure:** monetary value of goods procured or services provided by the household via purchase, domestic production, against

service and free receipts from different organizations, for own consumption or as gift to others.

**Gross expenditure:** household expenditure without reducing the income from sale of used goods.

**Net expenditure:** gross expenditure less the income from sale of used goods. Where the value of the sold goods is more than the purchased goods, the result is published as a negative figure.

**Household, urban and rural areas:** see Chapter 2, Definitions and concepts.

**Decile:** expenditure of consuming population sorted on the basis of the goods and services charges and then dividing the society into ten equal groups. Each group is called a decile.

**Income:** all the sums and value of goods received by the household for the job done or capital invested or from other sources (retirement pension, occasional income, etc.) during the enumeration. In this survey, various net incomes are as follows:

**Net wage and salary income of public, cooperative and private sectors:** income of all the wage and salary earners of the household working in public, cooperative and private sectors after deduction of the tax and retirement allowance..

**Agricultural self-employment income:** the income of the members of the household as employer or own account worker in agricultural sector after deduction of job on costs. The job on costs covers paid wage and salary, primary material charges, non-durable appliances, amortization, other production charges and job taxes.

**Non-agricultural self-employment income:** income of the members of the household as employer or own account worker in non-agricultural self-employment sector, after deduction of job on costs.

**Miscellaneous income:** all sums and goods value the household has received through ways other than its members employment, such as selling of the home-made manufactures, retirement pension, rental of movable and immovable assets, dividend, and charity and social security organization aids.

#### **Selected information**

In the year 1390, the average annual net expenditure of an urban household amounted to 132.7 million rials including 100 million rials for non-food expenditures (75.3 percent) and 32.8 million rials (24.7 percent) for food and tobacco which increased by 16.7 percent in comparison to the previous year.

In the year 1390, out of 100 million rials for average annual urban household net non-food expenditure the highest and lowest share was respectively related to housing expenditures with 44.4 million rials (44.4 percent) and household services with 0.06 million rials (0.06 percent) respectively.

Furthermore, in the same year, out of 32.8 million rials for annual urban household net food and tobacco expenditure, the highest and lowest share was respectively related to meat with 7.8 million rials (23.7 percent) and fruits and vegetable (for home consumption) with 0.03 million rials (0.1 percent)

In the year 1390, average rural household net expenditure amounted to 84 million rials including 51 million rials for non-food expenditures (60.8 percent) and 32.9 million rials (39.2 percent) for food and tobacco which increased by 20.5 and 26 percent in comparison to the previous year.

In the year 1390, out of 51 million rials for average net non-food expenditure of a rural household, housing expenditure with 15.3 million rials (30 percent) and household services with 0.05 million rials (0.1 percent) accounted

for the highest and lowest proportion of expenditure respectively. Moreover, out of 32.9 million rials average net food and tobacco expenditure of a rural household, flour of cereals; macaroni and similar products with 8.8 million rials (26.7 percent) and fruits and vegetable (for home consumption) with 0.03 million rials (0.1 percent) had the highest and the lowest shares among the expenditure items respectively.

In the year 1390, the average annual income of an urban household was about 130.3 million rials. Out of the income sources, miscellaneous incomes with 55.2 percent were of the highest share.

Also in the year 1390, the average annual income of a rural household amounted to 79.7 million rials. Out of the income sources, self-employment income with 45.4 percent was of the highest share.
