

Introduction

This chapter consists of statistical data on population size and its characteristics, taken from the last national census of population and housing in 1390, a comparison between selected demographic items from previous censuses, and data on vital events such as births, deaths, marriages and divorces.

History of data production on population in Iran dates back to Qajar period when some irregular efforts were made for enumeration.

In 1297, the Civil Registration Department was established to register the four vital events. Registration of data on births, deaths, marriages and divorces was a beginning for collection of information on the country's population and an incentive to assign an organization to collect the related data.

By the approval of a statute in 1303, the responsibility of collection of required information was entrusted to the Ministry of the Interior. Undergoing several changes in 1307, the statute was legally approved by the former National Consultative Assembly and the Civil Registration Department was renamed "General Department of Statistics and Registration". The Department has continued its legal duties since 1349 under the revised title of "National Organization for Civil Registration".

Approval of the first Census Act by the National Consultative Assembly in 1318 led to the implementation of the first population census in Tehran in the month of Esfand of the same year and in 33 more cities during the years 1319 and 1320. The project was delayed because of the 1320 political events. In Esfand 1331, the General Statistics Cooperation Organization was

formed and in Farvardin 1332, the Census and Statistics Act was approved. In the same year, after detaching from the General Department of Statistics and Registration and joining to the General Statistics Cooperation Organization, the Department of Census and Statistics undertook the responsibility of data collection exclusively. This Organization was renamed "the General Department of Public Statistics" affiliated to the Ministry of the Interior in 1334 and conducted the first national census of population and housing in 1335.

By the establishment of the General Department of Public Statistics and the implementation of the national census of population and housing in 1335, a new era began for statistical activities, and subsequently different statistical surveys in various socio-economic areas were carried out every year. The increasing need of planning organizations for information and statistics as well as the need for a close cooperation between the main data producing organization and planning organizations, led to the detachment of the General Department of Public Statistics from the Ministry of the Interior and its affiliation to the Plan and Budget Organization under the title of the Statistical Centre of Iran (SCI) in 1344.

As its first major activity, the SCI conducted a national census of population and housing in 1345. The establishment act of the SCI was revised in 1353 and current ACT of the SCI was approved.

After the approval of the new act and structural renewal of the Centre, it conducted the second national census of population and housing in Aban 1355.

The 1365 National Census of Population and Housing was the first under the Islamic Republic of Iran, the results of which provided required information for socio-economic development planning for the country.

Unpredictable increase of population during the years 1355 to 1365 and extensive population movements due to the Iraqi imposed war on Iran, made basic changes in the statistical frames resulted from the 1365 National Census of Population and Housing and this caused the planners and accordingly the SCI to find it essential to conduct a nationwide enumeration in the years before the next decennial census. This enumeration, accompanied with a sample survey for the first time in the country, was implemented in 1991 under the title of "1370 Multi-round Population Survey". The fifth national census of population and housing was carried out in 1375; in 1385 the sixth National Census of Population and Housing was taken across the country, and the seventh one was performed in Aban 1390 nationwide.

The 1390 Census enjoys some features which distinguish it from the previous ones. In this Census, in addition to the questions on the basic population, household and housing topics, new topics such as "national identity number", "internet use" (personally), "household agricultural holding" and "death in household" were asked. Also the Census experienced new development in collecting data methods, from conventional paper questionnaire to the more advanced methods. In this extensive, national and statistical exercise, for the first time, Personal Data Assistance (PDA) device was used for data collection in three enumeration areas, that is, Tehran, Alborz and Gilan provinces, which was aimed at getting readiness for future censuses by this method.

The statistics presented in this chapter consist of the 1390 National Census of Population and Housing results and a summary of previous censuses results including the 1370 Multi-round Population Survey. Moreover, statistics on the vital events of births, deaths, marriages and divorces are registers, prepared by the National Organization for Civil Registration.

Definitions and concepts

Population (under enumeration): members of all private settled households, institutional and collective, whose usual place of residence is located in Iran at the time of enumeration, as well as members of all private unsettled households. Foreign delegations, diplomatic corps and their families are excluded. However, Iranian delegations and members of Iranian diplomatic corps and their families at Iranian embassies in foreign countries are included in the population under enumeration.

Private household: persons living together in one residence, sharing their living expenses and eating together constitute a household. A person living alone also forms a private household.

Private settled household: a household living in a permanent residence which was made from hard materials, fixed tent, hut, straw hut, etc.

Private unsettled household: a household not living in a permanent residence at the time of enumeration. This group of households includes three types:

1. households either moving from one area to another or living under tents outside cities and villages;
2. households that do not live in a permanent place and change their living place continually, such as gypsies;
3. households that do not live in a specific place and usually pass the night at parks, in ruined places, under bridges, etc.

Institutional household: persons who share a common objective or characteristics living together in an institution which is responsible for their accommodation, (residential place with services and facilities) according to permission or specific regulations. Examples of institutional households are: barracks, garrisons, student dormitories (excluding those for married students) managed by universities, asylums, etc.

Collective household: persons who live together because of having common conditions (mainly common characteristics) and manage life affairs together.

City (urban area): every geographical area with a municipality.

In censuses before 1365, all Shahrestan centres (irrespective of their population size) and places with a population of 5000 persons and more were considered as city.

Village (rural area): one or more contiguous places and lands (agricultural or non-agricultural) located outside city borders and having independent registered or conventional boundaries. Any village inhabited by one or more households at the time of enumeration is considered as an "inhabited village", otherwise, it is considered an "uninhabited village".

Population settled in urban areas: population settled in urban areas in any administrative division of Bakhsh, Shahrestan, Ostan or country is the population of all cities located in the division concerned; and the population of each city is the total number of all private settled, institutional and collective household members whose usual place of residence is located in that city at the time of enumeration.

Population settled in rural areas: population settled in rural areas in any administrative division of Dehestan, Bakhsh, Shahrestan, Ostan or country is the population of all villages located in the division concerned; and the population of each village is the total number of all private settled, institutional and collective household members whose usual place of residence is located in that village at the time of enumeration.

Unsettled population: unsettled population in any administrative division of Shahrestan, Ostan or country is the population of all private unsettled households who were enumerated in the division concerned.

Head of Household: A member of the household who is acknowledged the head, by the other household members. It is noteworthy that the head is responsible for bearing all or major part of household expenditures or make decision on how the household incomes should be spent.

The head is not necessarily the oldest member of the household, but can be a male or female member who is usually more than 10 years old. It is obvious that in one-person households, the only member of the household is considered the household head.

Age: the number of completed years since the date of birth.

Mean age: average age of the population.

Median age: the age which divides the population into two equal groups in number.

Selected information

On the basis of the last Population and Housing Census taken in Aban 1390, the total population of the country was 75149669 persons (comprising 50.4% male & 49.6% female); average annual population growth was 1.3% while being compared to the result of the 1385 Population and Housing Census. In 1390, the highest population belonged to the age group 25-29 (11.5% of population). In the 1390 Census, there were 21.2 million households out of whom 72.82% were settled in urban areas and 27.12% were settled in rural areas and .06% was unsettled. In the mentioned year, the mean age for men and women was 29.8. Moreover, mean age for men and for women at the first marriage was 26.7 and 23.4 respectively.

In the year 1390, 7.6 percent of the cities had a population with more than 100,000 persons.

Between the years 1385 and 1390, more than 5.5 million people were internal or international migrants, out of which 91.95 percent had their previous place of residence in Iran, 1.85 % abroad and 6.19% did not state anything about their previous place of residence.

During the cited period, 39% of migrants had inter-provincial movement and 61% intra-provincial movement.

In the year 1390, registered births were over 1.4 million, out of which 48.7 per cent were female.

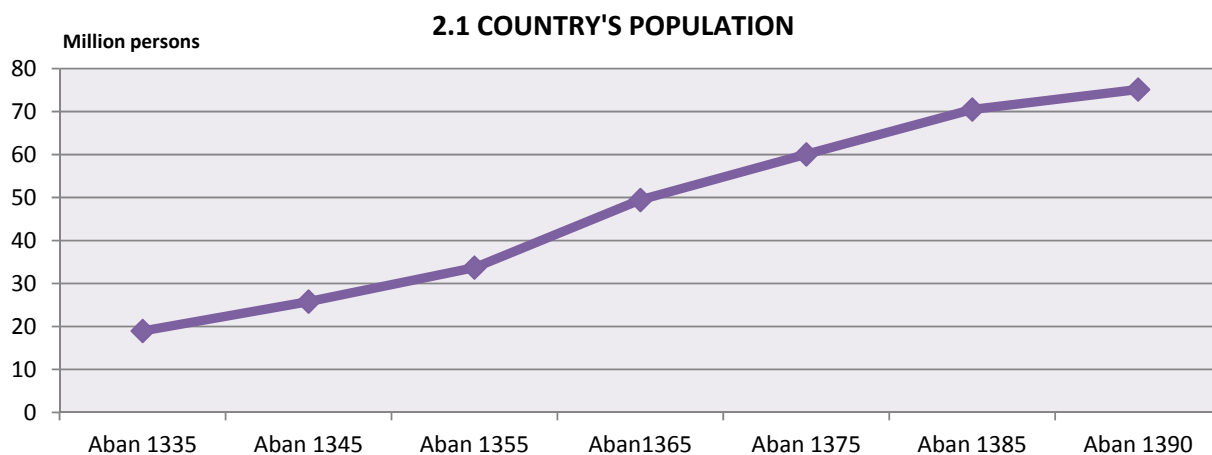

In this year, about 875000 marriages were registered, which shows a 1.9% decrease compared to the previous year, and 12.4 % of which relate to the marriages in which there was no age difference between the husband and the wife.

It is necessary to mention that the highest registered marriages belonged to the husbands and the wives without age difference. Moreover, 142.8 thousand divorces were registered which increased 4.1% compared to the previous year respectively.
