

C *Introduction*

Construction statistics presented in this chapter include data on the construction of residential and non-residential buildings and existing housing units, but exclude data for other types of construction such as dams, bridges, channels, and networks.

Registered data on construction permits issued by municipalities across the country were brought under consideration by the SCI in the year 1354, and collected and published annually as of the year 1358.

Statistics relating to construction activities of private sector in urban areas have been gathered and published by the Central Bank of Iran since the year 1343, which at present include the number, specifications and costs of residential and non-residential buildings.

Statistical data for residential and non-residential buildings in rural areas, including the number, construction costs, type of main construction materials used, etc. were collected and published by the SCI during the years 1351- 1353. Also, data on construction activities of the private sector in urban and rural areas were collected and published by the SCI for the years 1372, 1373, and 1375. The same data for rural areas were collected and published by the Centre for the years 1379, 1380, 1381 and 1382. From among the public sector organizations engaged in planning and implementing construction projects, only data related to the Islamic Revolution Housing Foundation are collected and disseminated as registers annually.

National Land and Housing Organization, the only organization authorized to cede land in urban areas, registers and disseminates data on the number of households receiving land for the construction of housing units, as well as the area of land ceded annually.

In addition, data on housing units sale price and rental for 21 populous cities of the country were collected and published by the SCI from 1372 to 1378. From the year 1379 to the year 1382, the same data have been collected for 30 cities. Ministry of Housing and Urban Development has collected and published these data for 30 cities from

the year 1383 to the year 1385, and for 32 cities since 1386. Moreover, statistics on housing cooperatives are prepared by the Ministry of Cooperatives and made available to interested bodies.

The statistics presented in this chapter are as follows:

- Permits issued for construction and extension of residential and non-residential buildings in urban areas.
- Characteristics of construction activities of the private sector.
- Improvement and construction of rural housing, construction and repair of housing units damaged by natural disasters.
- Land ceded in urban areas.
- Average sale price and rental of housing units.
- General characteristics of housing cooperatives.

Definitions and concepts

Building: is a fixed, roofed and enclosed structure detached completely from neighboring buildings by shared or separated walls. Size (smaller or large) or the number of floors is not considered in the definition of a building.

Completed building: is a building whose construction is finished at the reported period and is ready to use.

Land area: is the area of the owned land on which the building is constructed or reconstructed.

Total floor area: is the total area of all floors including basement, ground floor, semi-floor, first floor, and other floors.

Construction cost: either estimated at the beginning of construction work or upon completion of the work, it includes costs of the building plan, supervision by an engineer, construction permits, construction materials, work tools and equipment, workers' wages, architect fees, central heating system, lighting, water, sewage system, etc. Construction costs exclude the value of the land.

Mixed-use buildings (both residential and non-residential): are buildings used for both residence, and economic activities, or other purposes.

Investment: is all payments made for the establishment of a building during a specified

period, even if the building has not been completed during that period.

Construction activities: are all activities related to different stages of building construction including the digging of foundation, foundation work, footing beam, erection of the skeleton, building construction, installations and equipment, tile lining, sealing coat, painting, wiring, etc. Moreover, major and minor repairs in existing buildings including addition of another storey or new part, alteration or repair of installations, repair of water and gas pipes and sewage system, roof patching and insulating, repainting, changing of wall paper, repair of the compound, etc. are considered construction activities.

Major repairs: refer to reconstruction or renovation in some parts of buildings to increase their life or qualitative improvements, such as reinforcement of building skeleton, establishing thermal installations, façade making, and the like.

Minor repairs: refer to some operations carried out continuously to maintain buildings such as and sewage systems or other installations, etc.

Other construction activities: refer to all other activities not falling under any one of the above-mentioned categories, such as preparation of land.

Household: see Chapter 3, Population" Definitions and concepts.

Urban areas: see Chapter 3, Population" Definitions and concepts.

Rural areas: see Chapter 3, Population" Definitions and concepts.

Cooperatives: see Chapter 5, AGRICULTURE, FORESTRY & FISHERIES, Definitions and concepts.

Housing cooperatives: is the distributive cooperatives, which are engaged in supplying the members' housing within the statute of housing cooperatives.

Selected information

In the year 1397, over 142000 construction permits with 72011 thousand sq. m floor areas were issued by municipalities, which increased by 16.3 and 20.5 percent, respectively in comparison with the preceding year. It is noteworthy that over 84.8 percent of the permits issued are related to the housing units.

In the year 1396, the number of investments made in urban areas for the buildings whose construction is newly started, semi-finished, and completed was about 738148 billion rials, which increased by 22.6 percent in comparison with the previous year.

In the year 1397, the Shahr (cities) of Tehran, Esfahan and Arak with 81862, 26588 and 22139 thousand rials had the maximum average price and Yasuj, Ilam and Birjand with 3988, 7124 and 7506 thousand rials had the minimum average price per sq. m of the housing unit's floor area transacted in the real estates agencies. Besides, in the same year the Shahr of Tehran, Karaj, and Qazvin with 326635, 133018 and 107124 rials had the maximum average price, respectively and Ilam, Yazd and Yasuj with 33343, 33865 and 36235 rials had the minimum average price per sq m of the housing unit's floor area transacted in the real estate agencies between the landlord and leaseholder.
